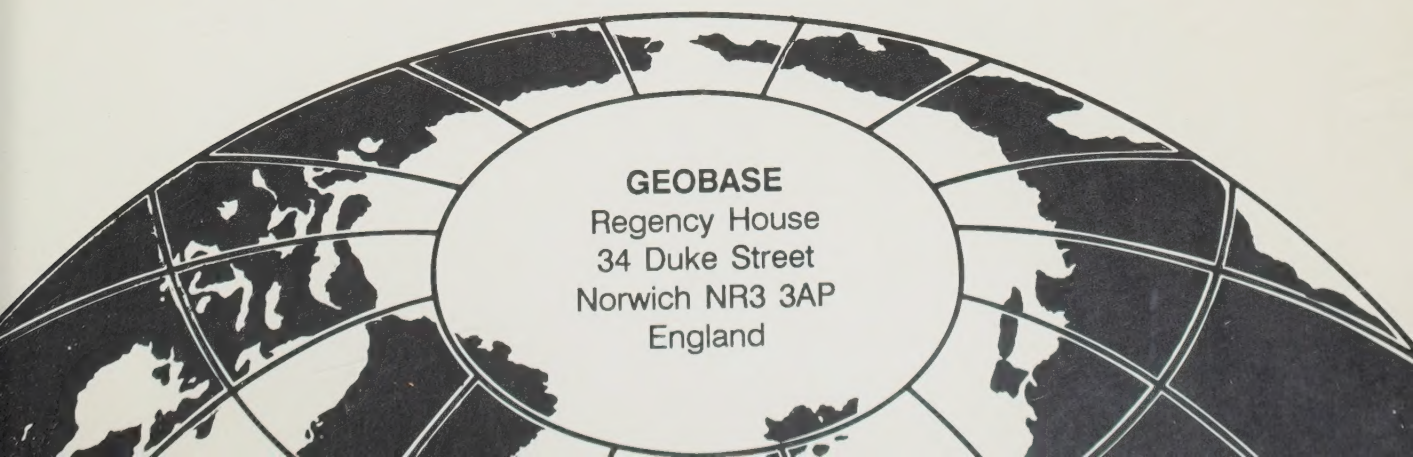
GEOBASE®

THE GEO ABSTRACTS DATABASE



Its not just Geography!

GEOBASE is a unique and invaluable online information source offering convenient access to the international literature on geography, geology, ecology and related disciplines.

GEOBASE provides a truly interdisciplinary service across language and cultural boundaries. Subjects covered include cartography, climatology, ecology, economic geography and geology, geomorphology, geophysics, hydrology, palaeontology, planning, stratigraphy and tectonics.

GEOBASE contains over 350,000 records dating from 1980 onwards, and over 40,000 are added annually in monthly updates. Each record includes an informative abstract as well as a bibliographic citation. Items for inclusion in the database are selected from over 2000 scientific and technical journals, as well as from books, reports, monographs and theses.

GEOBASE is currently available on the Dialog service as file 292. During 1990 the file will be loaded on the Maxwell Orbit Infoline service. Access to these services is available through most libraries.
